NEW ADDITION TO THE CAMPUS-MOBIPRINT

ITS department is happy to announce that our students will have another way to print their assignment and will not have to wait for a computer in one of the open labs. Starting Tuesday, 2/19/2018 first of many Wireless Print Stations (MobiPrint) will start functioning. Mobiprint will allow students t to print documents from Web and print them from the Wireless print stations. They can access the Website from home or their mobile devices of course they need to have acces to the document they want to print so they can upload it to system to print. Once they are in the campus and want to print their document they will need to log on to the release station with their username and password (Detailed directions for both these steps are listed below).

This MobiPrint is the first of four we expect to have on campus by June 30th, the location of MobiPprint is in the breezeway between the library and the MAC.
