COURSE DESCRIPTION

This course introduces the students to nursing care of children, from infancy through adolescence, and their families. The students will develop an awareness of the physiological and psychosocial needs of children. The needs of the children are addressed through Quality and Safety for Nurses (QSEN) Initiative incorporating the concepts of patient centered care, teamwork and collaboration, evidence-based practice, safety, quality improvement and informatics; the Nursing Process; and the Categories of Client Needs.

On-line learning experiences will consist of synchronous and asynchronous learning. Lecture will consist of: four (4) hours of synchronous instruction and two (2) hours of asynchronous learning through readings, videos, case studies, journal articles and discussion forum. Laboratory sessions will be in the virtual format and through the V-Simulation link in the on-line text book. Clinical sessions will be four (4) hours of clinical case study preparation and two (4) hours virtual with your assigned clinical professor.

END OF PROGRAM STUDENT LEARNING OUTCOMES (SLO)

Syllabus updated: 9/20 2/21
The following course SLOs apply when caring for the child and family experiencing acute, complex and/or long-term health alterations. The course SLOs will be achieved by the end of the semester.

1. Organize nursing care to provide a safe patient environment.
2. Prioritize nursing interventions when providing nursing care.
3. Integrate evidence-based nursing practice into nursing care.
4. Integrate critical thinking/clinical reasoning strategies when providing nursing care.
5. Support principles of teamwork and collaboration when working with members of the interprofessional team.
6. Develop appropriate leadership/management strategies when providing nursing care.
7. Incorporate the utilization of informatics principles and technology systems while providing nursing care.
8. Support ethical and legal principles relevant to the practice of a registered nurse.

ATTENDANCE
Complete participation in class is possible only when students are able to focus attention on the class, therefore, entering the virtual class after it has begun is disrespectful to Faculty and classmates. Talking out of turn or exhibiting other disruptive behaviors is not tolerated and students will be asked to leave the virtual classroom or lab. Student must have video and audio capability turned on in order to participate in the virtual classroom setting.

A student is deemed excessively absent in any course when he or she has been absent 15% of the number of contact hours a class meets during this virtual semester. When a student is excessively absent, a grade of “WU” will be assigned as described in the college catalogue.

STUDENT WITH DISABILITIES
Access-Ability Services (AAS) serves as a liaison and resource to the KCC community regarding disability issues, promotes equal access to all KCC programs and activities, and makes every reasonable effort to provide appropriate accommodations and assistance to students with disabilities. Your instructor will make the accommodations you need once you provide documentation from the Access-Ability office (D-205). Please contact AAS for assistance.

EXAM POLICY
All course exams are administered electronically via ExamSoft. Students will be monitored during the exam therefore it is imperative that the student use a computer with audio and video capabilities. The student testing environment should be in an area with adequate Wi-Fi and free from distractions and personal items. The CUNY Policy on Academic Integrity is strictly enforced throughout the exam. Any suspected violation of this policy may result in removal.

Syllabus updated: 9/20 2/21
from the course. Examples of this behavior include, but are not limited to, talking, use of any reading material, hand gesturing, and presence of other individuals in the immediate area. No headphones (both wireless and non-wireless) or any other device that can receive sound is permitted during the exam. There will be no individual exam reviews with faculty members and there will be no group exam review at the end of the exam.

Please be advised that, pursuant to accreditation requirements, the nursing program requires the mandatory use of remote proctoring tools for exams for all students in all nursing courses, regardless of whether a course is given in person or remotely.

**NUR 2300** – Final grades will be calculated as follows: Please see attached grading rubric for each assignment in blackboard under Course Information.

**Course Organization:**

**TOPICAL OUTLINE**

*Each Topic incorporates the Categories of Client Needs: Safe and Effective Care Environment (Management of Care, Safety and Infection Control), Health Promotion and Maintenance, Psychosocial Integrity, Physiological Integrity (Basic Care and Comfort, Pharmacological and Parenteral Therapies, Reduction of Risk Potential, Physiological Adaptation. Specific weekly topics to be covered are located in your week-to-week schedule.*

- Orientation to Nursing of Children
- Assessment and Management of the Child who has Respiratory Disorders
- Assessment and Management of the Child who has Cardiovascular Disorders
- Assessment and Management of the Child who has Gastrointestinal Disorders
- Assessment and Management of the Child who has Hematological Disorders
- Assessment and Management of the Child who has Immunological Disorders
- Assessment and Management of the Child who has Musculoskeletal Disorders
- Assessment and Management of the Child who has Genitourinary Disorders
- Assessment and Management of the Child who has Integumentary Disorders

Syllabus updated: 9/20 2/21
Content/Lecture Discussion

Unit 1/ Week 1

Orientation to Care of the Children/ Nursing 2300

- Current trends in health care for children
- Social-Cultural Health Promotion
- Family Influence on Child Health
- End-of-Life-Care
- Developmental Stages of Children
  - Physical
  - Psychosocial
  - Role of Play
  - Stressor/Coping with hospitalization
  - Therapeutic Communication
  - Pain Management
  - Pediatric Variations
  - National Patient Safety Goals
  - Legal/ethical issues in Pediatric nursing
- Strategies for identifying and managing care of the child during the well-child visit utilizing a team approach
- Strategies relevant to the outcomes of care for the adult for child and family during the well-child visit
- Application of critical thinking processes when practicing safely in the delivery of care for the child and family
- Use of the nursing process throughout the mutually designed plan of care for the child and family

Assessment and Management of the Infant and Family

Week 2 – The Pulmonary and Cardiac System

Content/Lecture Discussion

- The structure and function of the pulmonary and cardiac system
- Alterations in the pulmonary and cardiac system
  - Bronchiolitis/Respiratory Syncytial
  - Sudden Infant Death Syndrome
### Assessment and Management of the Infant and Family

#### Week 2 – The Pulmonary and Cardiac System

- Apnea of Infancy
- Congenital Heart Disease
- Kawasaki Disease

- Strategies for identifying and managing care of the child with pulmonary and cardiac complications utilizing a team approach
- Strategies relevant to the outcomes of care for the child with pulmonary and cardiac health alterations.
- Application of critical thinking processes when practicing safety in the delivery of care for the child with pulmonary and cardiac related needs
  - Diagnostic procedures
  - Pharmacological agents
- for children: electronic medical records

#### Week 3 – Fluid and Electrolyte Balance, Gastrointestinal System

**Content/Lecture Discussion**

- The structure and function of fluid and electrolyte/gastrointestinal system
- Alterations in fluid and electrolyte balance and the gastrointestinal system
  - Dehydration
  - Gastroenteritis
  - Hirschsprung disease
  - Gastroesophageal reflux disease
  - Cleft lip/Cleft palate
  - Hypertrophic pyloric stenosis
  - Intussusceptions
  - Failure to thrive
  - Celiac disease
  - Appendicitis
  - Diabetes Mellitus Type I

- Strategies for identifying and managing care of the child with gastrointestinal complications utilizing a team approach
- Strategies relevant to the outcomes of care for the child with electrolyte and gastrointestinal alterations
- Application of critical thinking processes when practicing safety in the delivery of care for the child with gastrointestinal related needs
  - Diagnostic procedures
  - Pharmacological agents
  - Laboratory values
- Use of the nursing process throughout the mutually designated plan of care for the child and family
- Utilization of technology in the care for children: electronic medical records

Syllabus updated: 9/20 2/21
Assessment and Management of the Infant and Family/Neurological

Week 3

Content/Lecture Discussion

- Strategies to involve the child and family in reaching successful outcome for the child with congenital defects
  - Developmental Dysplasia of the Hip
  - Cerebral Palsy
  - Hydrocephalus
  - Spina Bifida
  - Congenital clubfoot
- Strategies for identifying and managing care of the child with congenital defects utilizing a team approach
- Strategies relevant to the outcomes of care for the child with congenital defects
- Application of critical thinking processes when practicing safety in the delivery of care for the child with congenital defects.
  - Diagnostic procedures
  - Pharmacologic agents
  - Laboratory values
- Use of the nursing process throughout the mutually designated plan of care for the child and family.
- Utilization of technology in the care for children: electronic medical records

Assessment and Management of the Toddler and Family

Week 4 - Integumentary System

Content/Lecture Discussion

- The structure and function of the integumentary system
- Integumentary alterations in children
  - Eczema
  - Child Abuse
  - Burns
  - Communicable Diseases
  - Pediculosis Capitis
  - Scabies
  - Pinworms
  - Ringworms
  - Acne

Syllabus updated: 9/20 2/21
## Assessment and Management of the Toddler and Family

### Week 4 - Integumentary System

- Strategies for identifying and managing care of the child with integumentary alterations utilizing a team approach
- Strategies relevant to the outcomes of care for the child with integumentary alterations
- Application of critical thinking processes when practicing safety in the delivery of care for the child with integumentary related needs
  - Diagnostic procedures
  - Pharmacologic agents
  - Laboratory values
- Use of the nursing process throughout the mutually designated plan of care for the child and family
- Utilization of technology in the care for children: electronic medical records

## Assessment and Management of the school-age child

### Hematological and Immunological Disorders

#### Content/Lecture Discussion

- The structure and function of hematologic and immunologic systems
- Alterations in the hematologic and immunologic systems
  - Iron Deficiency Anemia
  - Sickle Cell Anemia
  - Hemophilia
  - Thalassemia
  - Leukemia
  - Rheumatic Fever
  - HIV
- Strategies for identifying and managing care of the child with hematological and immunological complications utilizing a team approach.
- Strategies relevant to the outcomes of care for the child with hematological and immunological alterations.
- Application of critical thinking processes when practicing safety in the delivery of care for the child with hematological and immunological related needs.
  - Diagnostic procedures
  - Pharmacological agents
  - Laboratory values

Syllabus updated: 9/20 2/21
Assessment and Management of the school-age child

Hematological and Immunological Disorders

- Use of the nursing process throughout the mutually designated plan of care for the child and family.
- Utilization of technology in the care for children: electronic medical records

Assessment and Management of the Adolescent and Family

Week 5 – Genitourinary and Musculoskeletal Systems

Content/Lecture Discussion

- The structure and function of genitourinary system
- Alterations in the genitourinary system in children
  - UTI
  - Nephrotic Syndrome
  - Acute Glomerulonephritis
  - Wilms Tumor
- The structure and function of musculoskeletal system
- Alterations in the musculoskeletal system in children
  - Legg-Calve-Perthes Diseases
  - Slipped Femoral Epiphysis
  - Scoliosis
- Strategies for identifying and managing care of the child with genitourinary and musculoskeletal complications utilizing a team approach
- Strategies relevant to the outcomes of care for the child with genitourinary and musculoskeletal alterations.
- Application of critical thinking processes when practicing safety in the delivery of care for the child with genitourinary and musculoskeletal related needs.
  - Diagnostic procedures
  - Pharmacologic agents
  - Laboratory values
- Use of the nursing process throughout the mutually designated plan of care for the child and family.
Required Text book and Materials:

This Class will be accessed through Course Point Plus. Each assignment will be monitored by both your lecture instructor and your clinical instructor. In order for you to access the assignments you must purchase this product prior to class in which time you will be granted an access code. The instructors will then give you the COURSE access code so you can view your assignments.
