Subject: Underground Heating Piping Leak Detection Investigation at V & K Buildings Loop

The College Community,

On or about March 15th, Cameron Engineering (a DASNY contractor) will be doing exploratory probes to check for suspected leaks in the underground heating piping loop from the Regina S. Peruggi Academic Center [aka: Academic Village (V) building] to the LMG High School (K) building].

Acoustic Sound Technology and Thermal Imaging will be used to pin point the area(s) in need of piping repairs.

All of the probes will be done during night time.

Once the probes are completed I will have more accurate information on the scope of work for this project and the exact areas on campus which will be affected by any excavation work.

If any questions, please do not hesitate to contact me.

Thank you.

Ed Rios
Vice President for Finance and Administration
Kingsborough Community College
