Writer’s Extravaganza
This course offers an opportunity to learn, practice, and improve your writing technique and grammar. Writing exercises will be age appropriate and will include college essay preparation, high school essay writing, screenwriting, journalism and more.

Computers & Science
This two-in-one course will provide fun and interesting lessons in computers and science. In the computer class, you will learn web development and 3D computer-aided design. In the science class, you will enjoy lessons in robotics and forensics.

Dance Boot Camp
This course provides time to learn and practice 3 dance techniques.

The Lester Horton Technique - This unique technique, developed in the 1920’s, 30’s and 40’s, was influenced by Native American dance, Japanese arm movements and isolations for the upper and lower body, as well as Afro-Caribbean style.

The Martha Graham Technique - Modern dance utilizing ballet techniques. Graham’s technique focuses on the use of breath to initiate movement and the use of the spiraling and twisting of the spine to create and initiate movement.

Contemporary Movement Improvisation and Choreography - The class teaches young artists various choreographic tools, and stylistic approaches to movement, while introducing them to new contemporary choreographies and techniques. Time in class is spent on intense contemporary cardio warm up, stretch time and discussion, group and individual choreography, and technique.
