Student E-mail Setup for Android Phone

a.k.a Microsoft Exchange E-mail
Set Up Exchange E-Mail on an Android Mobile Phone

How do I set up Exchange ActiveSync on an Android mobile phone?

1. From the Applications menu, select Email. This application may be named Mail on some versions of Android.

2. Type your full e-mail address, (john.carter25@students.kbcc.cuny.edu), and your password, and then select Next.

3. Select Exchange account. This option may be named Exchange ActiveSync on some versions of Android.

4. Enter the following account information and select Next.
   - **Domain\Username**: Type your full e-mail address in this box. If Domain and Username are separate text boxes in your version of Android, leave the Domain box empty and type your full e-mail address in the Username box.
   - **Password**: The day of your birth (052286).

5. **Exchange Server** pod51004.outlook.com

6. As soon as your phone verifies the server settings, the Account Options screen displays. The options available depend on the version of Android on your device. The options may include the following:
   - **Email checking frequency**: The default value is Automatic (push). When you select this option, e-mail messages will be sent to your phone as they arrive. We recommend only selecting this option if you have an unlimited data plan.
   - **Amount to synchronize**: This is the amount of mail you want to keep on your mobile phone. You can choose from several length options, including One day, Three days, and One week.
   - **Notify me when email arrives**: If you select this option, your mobile phone will notify you when you receive a new e-mail message.
   - **Sync contacts from this account**: If you select this option, your contacts will be synchronized between your phone and your account.

7. Select Next and then type a name for this account and the name you want displayed when you send e-mail to others. Select Done to complete the e-mail setup and start using your account.
