

Professional Organizations

- **ASHRAE**

<https://ashraeny.org/index.php>

The organization ASHRAE New York City Chapter focuses on advancing the arts and sciences of heating, ventilation, air conditioning and refrigeration. It provides professional education, networking, events, and programs for young engineers and related professionals to support high-performance, sustainable built environments in the New York City area.

- **National Society of Professional Engineers**

<https://www.nspe.org/membership/types-membership/student-membership>

National Society of Professional Engineers's Student Membership is a free membership category for full-time engineering students that gives access to the society's professional community, career resources, scholarships, newsletters, and events to help jump-start a student's engineering career. It connects aspiring engineers with networking, development opportunities, and the same benefits enjoyed by regular members while they're still in school.

- **American Society of Civil Engineers**

<https://www.asce.org/communities/student-members>

The American Society of Civil Engineers (ASCE) Student Membership program provides civil engineering students with free access to professional resources, networking opportunities, and hands-on learning experiences. Through competitions, scholarships, and career tools, it supports students in developing skills and preparing for successful careers in civil engineering.
