

# Networking Events Outside KCC

---

- **American Physical Therapy Association**   
<https://www.apta.org/apta-and-you/chapters-sections-academies>

An APTA local chapter/district meeting is a gathering organized by a state chapter where members in that region come together for local networking, continuing education, advocacy discussions, and professional development relevant to their community and practice. These meetings often include continuing education sessions led by experienced clinicians or guest speakers, guiding students within their studies about current evidence-based practices, treatment techniques, and updates in state regulations that directly impact their clinical work.
