

Proactive Steps

Early Planning Efforts for Physical Education, Recreation and Recreation Therapy Students

- ✓ **Identify the career path you going to pursue including specific area of specialization (physical education teacher, recreation manager/leader, recreation therapist, adapted physical education teacher, sport management specialist, coach, sport analyst, sport media, athletic trainer, and athletic director)**
- ✓ **Create a plan by researching, contacting, and visiting the Professional Organizations and institutions that you are interested in being employed in the very near future.**
- ✓ **Identify education pathways inclusive of baccalaureate, masters degree, certifications, and licensing.**
- ✓ **As a student in the PERRT program the capstone course is RPE 9152 Fieldwork taken in the last semester. All students are required to complete 100 hours of field experience under the supervision of a professional supervisor who provides guidance and evaluation of work. Create an action plan based on feedback from the professional supervisor and your experience at the field site.**
